

# Carevium Adult Day Care Software

## Focus on Client Care, Not on paperwork

Most aspects of Adult Day Care businesses providing care for clients are simplified with the use of cloud based Carevium Adult Day Care Management Software application. From client in-take to attendance tracking, and care planning to billing, Carevium automates all operations of adult day care service center.

The software implementation is quick and easy with no upfront investment. Carevium is very user-friendly. Carevium team helps implement the cloud based system for our Adult Day Care customers to get them started on the service quickly. Using modern technologies, such as online seminars/webinars, video walk-throughs, and remote access to screens, we will be there to guide your staff in every step.

Corporate management can also get centralized, consolidated views of every aspect of business with live reports. Carevium supports single office, multi-locations, and franchise system owners.
