

I love using Carevium for all management activities!

Carevium Independent Living Software

Focus on Resident Service, Not on paperwork

Most aspects of Independent Living Senior Retirement communities providing housing for seniors are simplified with the use of cloud based Carevium Independent Living Management Software application. From client in-take to lease tracking, and work orders management to billing, Carevium automates all operations of independent living and retirement communities.

The software implementation is quick and easy with no upfront investment. Carevium is very user-friendly. Carevium team helps implement the cloud based system for Retirement Living customers to get started on the service quickly. Using modern technologies such as online seminars/webinars, video walk-throughs, and remote access to screens, we will be there to guide your staff in every step.

Corporate management can also get centralized, consolidated views of every aspect of business with live reports. Carevium supports single community, multi-locations, and management companies.
